As an ISO certified company, Brake Supply has developed **re**manufacturing standards that meet or exceed OE specifications, servicing all internationally known heavy equipment parts and components, maintaining extensive part numbers in our exchange inventory, and ready to ship the same day we receive your order. This has been our definition of *productivity* since 1947.

With our superior quality, expert service, competitive pricing and the broadest **re**manufactured product line in the industry, discover how Brake Supply will **re**define new levels of productivity—and success for you—by calling us today.

Brake Supply has **over 300,000 sq. ft.** of state-of-the-art **rebuild** facilities and over 30 million dollars in inventory strategically located throughout North America.

Brake Supply **remanufactures** over 1,000 heavy equipment parts and components to OE quality and better. When you need parts you can depend on, we are ready to ship them—any time, anywhere.

## READY TO DELIVER— EVERY DAY

Brake Supply's **over 30 million dollar inventory** ensures that your parts are in stock and ready to ship the same day your order is placed. This saves you time, money and the additional cost of extensive downtime. Brake Supply's computerized OE cross-reference system makes ordering quick and easy. Order by phone or online, with the original part number, and our inventory team will have it on a truck the same day, delivering worldwide, 24/7. You can depend on it.

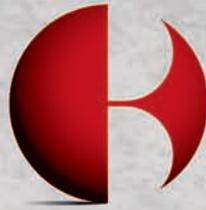

## DEPENDABLE QUALITY

Brake Supply **re**defines the word *dependable* to mean more trustworthy, less downtime, and better performance. We justify this definition by carefully documenting and assessing every teardown—then we go beyond OE **re**build recommendations—to completely **re**manufacture each part and component. While OE manuals recommend visual inspection, our precise measurements and nondestructive tests validate the integrity of each component before the **re**manufacturing process begins. Once this process is complete, finished products are rigorously tested to ensure optimum performance levels.

Whether it's a replacement part or a fully **re**manufactured drivetrain, you can trust us to deliver dependable parts and components for all of your equipment.
